**DETAILED ACTION**

***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 5/11/2004 has been entered.

**EXAMINER'S AMENDMENT**

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Thomas J. D 'Amico on September 14, 2004.

Attorney agreed to change the claim 19.

Claim 19 (amended) The camera apparatus claimed in ~~any one of claims 1, and 4 to claim 15~~, said zoom lens further comprising a macro mode capable of focusing at a shorter distance than an ordinal photographing region, wherein said focusing is performed by movement of the fifth lens band in a predetermined direction in any one of the ordinal photographing region and the macro mode.

***Allowable Subject Matter***

3. Claims 4 – 28, 31, 32, 36 – 38, 41 and 43 – 86 are allowed.
4. The following is an examiner's statement of reasons for allowance: The prior art taken either singularly or in a combination fails to anticipate or fairly suggest the limitations of the independent claim, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims 4, 7, 31, 41, 43 and 44, which include a zoom lens system comprising five lens groups having optical refractive power (+, -, +, +, +), an aperture diaphragm located in the third lens group, when a zooming second and fourth lens group move from short to long focal point ends, where a distance ( $D_{1W}$ ) between the first and second lens band in the short focal length end arrangement distance ( $D_{1T}$ ) between the first and second lens bands in the long focal point end arrangement, a distance ( $D_{3W}$ ) between the third and fourth lens bands in the short focal point end arrangement, a distance ( $D_{3T}$ ) between the third and fourth lens bands in the long focal point end arrangement substantially meet the following inequality: ( $D_{3W} -$

$D_{3T} / (D_{1T} - D_{1W}) > .3$  (as in claim 4), the prior art fails to teach where a variance of an image surface caused by the smooth movements of second and fourth lens band is compensated by movement of the fifth lens band in a predetermined direction (as in claim 7, 31, 41, 43 and 44).

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
